

AL580-HDX

High Capacity Lift for Large Mid-Wheel Power Chairs

LIFTS UP TO 450 LB

The AL580-HDX is designed to lift and transport heavy mid-wheel power chairs with wheel sizes from 10" - 14" (25.4 cm - 35.6 cm). Have confidence that your mobility device is secure using 4-Q'Straint Retractors coupled with a Hold-Down Arm. Position your power chair on the platform, secure the retractors and power up the lift to transport height.

The Stars-N-Stripes platform guards against road debris and an optional Swing-Away provides access to your vehicle's cargo area when not in use. The AL580-HDX is compatible with a variety of SUV's, Trucks, and Crossovers.

EASY ACCESS

Harmar's Swing-Away accessory helps give you full access to the trunk, hatch or truck bed of your vehicle. When your lift is unloaded and returned to a travel position, release the latch and safety pin, and gently swing it to the side.

HEAVY DUTY LIFT

AL580-HDX

The AL580-HDX allows me to take my Custom Power Chair without sacrificing my cargo space. Love its ease of use.
